Rapportering till EU-kommissionen om övervakning på gemenskapsnivå av import av stenkol med ursprung i tredje land

Härmed redovisas importstatistik avseende stenkol under föregående halvår i enlighet med rådets förordning nr 405/2003 av den 27 februari 2003. Rapporteringen är ställd till Näringsdepartementet. Rapporteringsperioden avser andra halvåret 2008 och revidering av statistiken för första halvåret 2008.

Beslut i detta ärende har fattats av generaldirektören Tomas Kåberger. Vid den slutliga handläggningen har därutöver deltagit avdelningschefen Zofia Lublin, enhetschefen Caroline Hellberg samt handläggaren Malin Lagerquist, den sistnämnde föredragande.

Bilaga:
Kolrapportering med statistik för andra halvåret 2008
Reviderad kolrapportering med statistik för första halvåret 2008

Tomas Kåberger
Malin Lagerquist

With the US dollar being the main currency in international coal trade and in order to ensure consistency with currency exchange rates, please provide the price information in US dollars. The Commission will undertake the conversion to Euros.

A. Hardcoal intended for the production of electricity and/or for combined heat and power generation.

The following should be provided to the Commission:

Year/semester	2 nd half of 2008	Sweden
Tonnes:	133 048	Unit t
Net Low Calorie Value:	25,89	Unit GJ/t
Average importprice:	130,8	Unit USD/tce

In order to calculate the average value for the Member State, the “import price” of thermal coal will need to be converted using the price of the “tonne coal equivalent (tce)” as follows:

→ If the net low calorie value (NLCV) of a tonne hard coal is expressed in **GJ/t**:

$$\text{Price per tce} = \frac{\text{Price per tonne} * 29,302}{\text{NLVC}}$$

→ If the net low calorie value (NLCV) of a tonne hard coal is expressed in **Kcal/kg**:

$$\text{Price per tce} = \frac{\text{Price per tonne} * 7000}{\text{NLVC}}$$

B. Hardcoal intended for the production of coke for blast furnaces

The following should be provided to the Commission:

Year/semester	2 nd half of 2008	Sweden
Tonnes:	1 141 565	Unit t
Average importprice:	270,0	Unit USD/tce

In order to calculate the average value for the Member State, the “import price” of cooking coal will be converted using the following reference grades and the mathematical formula (1):

- Moisture (EO): 8%
The price will be corrected by 1% for each 1% difference.
- Ach, dry (CO): 7,5%
The price will be corrected by 2% for each 1% difference.
- Volatile matter, dry (MO): 26%
The price will be corrected by 0,3% for each 1% difference.
- Sulphur, dry (SO): 0,8%
The price will be corrected by 5% for each 1% difference.

$$(1) PO = P\{1+1/100((E-EO)+2(C-CO)+0,3(M-MO)+5(S-SO))\}$$

PO = Average import price – coal import price in standard conditions above mentioned

P = Coal imported price

E = % water in the imported coal

C = % dry ash in the imported coal

M = % dry volatile matter in the imported coal

S = % dry sulphur in the imported coal

Reviderad

With the US dollar being the main currency in international coal trade and in order to ensure consistency with currency exchange rates, please provide the price information in US dollars. The Commission will undertake the conversion to Euros.

A. Hardcoal intended for the production of electricity and/or for combined heat and power generation.

The following should be provided to the Commission:

Year/semester	1 st half of 2008	Sweden
Tonnes:	75 629	Unit t
Net Low Calorie Value:	25,89	Unit GJ/t
Average importprice:	115,3	Unit USD/tce

In order to calculate the average value for the Member State, the “import price” of thermal coal will need to be converted using the price of the “tonne coal equivalent (tce)” as follows:

→ If the net low calorie value (NLCV) of a tonne hard coal is expressed in **GJ/t**:

$$\text{Price per tce} = \frac{\text{Price per tonne} * 29,302}{\text{NLVC}}$$

→ If the net low calorie value (NLCV) of a tonne hard coal is expressed in **Kcal/kg**:

$$\text{Price per tce} = \frac{\text{Price per tonne} * 7000}{\text{NLVC}}$$

B. Hardcoal intended for the production of coke for blast furnaces

The following should be provided to the Commission:

Year/semester	1 st half of 2008	Sweden
Tonnes:	724 754	Unit t
Average import price:	204,3	Unit USD/tce

In order to calculate the average value for the Member State, the “import price” of cooking coal will be converted using the following reference grades and the mathematical formula (1):

- Moisture (EO): 8%
The price will be corrected by 1% for each 1% difference.
- Ach, dry (CO): 7,5%
The price will be corrected by 2% for each 1% difference.
- Volatile matter, dry (MO): 26%
The price will be corrected by 0,3% for each 1% difference.
- Sulphur, dry (SO): 0,8%
The price will be corrected by 5% for each 1% difference.

$$(1) \quad PO = P \{ 1 + 1/100((E-EO) + 2(C-CO) + 0,3(M-MO) + 5(S-SO)) \}$$

PO = Average import price – coal import price in standard conditions above mentioned

P = Coal imported price

E = % water in the imported coal

C = % dry ash in the imported coal

M = % dry volatile matter in the imported coal

S = % dry sulphur in the imported coal
